

Healing Testimony

Sunday, July 18 2010

Trish walked into our church on Sunday limping. She had a growth on her foot that was causing her a lot of pain and made it hard for her to walk. After our 9:00am service Trish came forward to support a friend of hers who was receiving prayer for pancreatic cancer. Her friend mentioned that she was pregnant and asked if we could pray for her and the baby. As our prayer ministers were asking God for a healthy baby and a smooth delivery, God had something He wanted to give to Trish right then.

As the team prayed Trish felt what she called “a flame” in her foot that was followed by a cooling sensation and then a sense that her foot and leg were being lifted up. When everyone was done praying Trish stood up and the pain in her foot was gone. She walked out of the church without limping and noticed that the growth on her foot was completely gone too. Thank You Lord!
